

**B • GFN-30 型内热式灌装封尾机**  
**B • GFN-30 Inner-Heating Filling & Sealing Machine**

The machine can automatically feed tube, orientate eye marks and is used for filling cream (paste)-like and liquid-like materials into plastic tube or plastic-aluminium laminated tube and then sealing them, pressing date or product numbers on the end of the tube and cutting the end. This machine is widely used in daily cosmetic, medicine and food industries.

Features: A high efficient heater and a stable flow meter imported from Germany are applied. They provide a reliable thermo-air heating system, which makes the seal firm in a high efficiency. The filling heads in different specifications are prepared for materials in different thickness.

主要技术参数 (Main technical parameters)

型号	Type	B • GFN30		
电源	Power Supply	380V/50Hz		
气源	Air Supply	0.6-0.8MPa		
耗气量	Air Consumption	<0.6m <sup>3</sup> /min		
灌装量	Filling Quantity	10-50ml	50-100ml	100-200ml
计量精度	Volume Precision	≤±5%	≤±3%	≤±2%

生产能力	Productivity	25-30pcs/min
可封管径	Tube Diameter	φ 16- φ 50mm
外形尺寸	Dimension(L×W×H)	1000×750×1500mm
机器重量	Weight	260kg
